

## Exercise #4

### HTML BASIC

Aitrich Technologies Pvt. Ltd.  
© All rights reserved.

## Introduction

This document is a specification for the exercise problems for the topic, Basic HTML. It tests the student's level of knowledge and understanding of the topic.

This document consists of a set of problems that the student needs to solve and submit to the trainer, in the format specified in the Deliverable section of this document.

This exercise is to be performed only after the theory and workshop sessions of the topic, hence the student would have enough knowledge and confidence on the topic. Ideally, the student should be able to solve the problems himself/herself; however, he/she can seek the assistance of the trainer or lab assistant in case he/she is stuck with a specific problem.

## Objectives

The objectives of this exercise are to test the student's understanding and knowledge on the topic, and to allow him to re-iterate his understanding by applying that knowledge in a software problem, so that he can use it in the further Programming endeavors.

## Problem 1: Create HTML page

either of Java (JEE), Microsoft.Net or PHP. wight

## Features to be developed

The HTML page Which Contain  
Heading Its Style  
Paragraphs And its Style  
Image  
Use image as a link to web page

### Deliverable

The entire program should be developed in a single Basic HTML and delivered as a zip archive. The zip archive should be accompanied by a summary document in Microsoft Word format, with the following sections  
List each feature specified in this document, and explains how it is implemented,  
How to execute the program(s).

## Demo

The student should demonstrate the program to the instructor on a PC, by explaining the features one by one.

## Conclusion

The completion of this exercise should re-iterate the student's confidence on Basic HTML. Please make sure you have gained enough confidence to move on.
